- Have a way of advising customer of additional repair recommendations as a web page and/or email.
- Have a dashboard interface for the service advisor.
- Have a dashboard interface for the service technician.
- Have a dashboard interface for the service manager.
- Have a main sign up page for clients.
- Have a landing page to show off our product.
- Interface/pages for parts.
- Analytical tools for management(revenue, performance, trends).
- Portal for customers to view all their data.

## User stories for release

### Sprint 1

- 3 - As a team member i will need to learn technologies needed: html, css, javascript, bootstrap, node, express, mongodb in order to work on our application.
- 3 - As a service advisor I need a repair form to enter in repairs needed, itemized list of parts and cost.
- 3 - As a service technician I need a repair form to know what the vehicle needs and also a CCR(complaint, cause, recommendation) area for me to enter my findings.
- 3 - As a service technician I need a vehicle inspection form to indicate my findings on the vehicle and recommend additional repairs as necessary.
- 2 - As a service advisor I need a form to enter in customer information.
- 2 - As a service advisor I need a form to enter in the customer's vehicle information.

### Sprint 2

- 5 - As a service advisor I need a repair order form that looks good and is easy to use.
- 5 - As a service technician I need a vehicle inspection form that looks good and is easy to use.

### Sprint 3

- 3 - As a customer I need a final paperwork of repairs done to my car that looks good and is given to me as a web page and/or email so I won't lose it and will be able to access it easily at any time.
- 4 - As a service advisor I want a way to communicate with the customer for additional repairs by link/email to let them know what is going on with their vehicle. They will be able to accept or decline repairs
- 3 - As the product owner I want the application to look polished so I can show my superiors and/or potential clients.

## Sprint 4

- **3** - As a service advisor I want a dashboard interface to create/update repair order forms.
- **3** - As a technician, I want a dashboard interface to retrieve repair orders that are available.
- **3** - As a manager for the shop I want a dashboard to create accounts for my advisors and technicians.
- **2** - As a client of TopShop I want to create my own account for the business.
- **3** - As the product owner I want a nice landing page to advertise TopShop.

## Product Backlog

- Interface/pages for parts.
- Analytical tools for management(revenue, performance, trends).
- Portal for customers to view all their data.

## Project Presentation

- See presentation file on github.
